1. Write a Program to insert String and String Buffer Object into the TreeSet where sorting order is increasing length order if two Objects having the same length then consider their alphabetical order.
Example
 String Object - A, XX, ZZZ,
 String Buffer - ABC , AA, ABCD,
 Final Answer – A, AA,XX,ABC ZZZ,ABCD

2.   Remove all elements but at the only one elements will remove and if the elements is duplicate then remove one. Till array got empty. And print how many time on get array empty.
        Array – [1,1,1,2,2,5,0,0,6]

3.   Insert 15 element print 3 elements then sleep for 2 sec then print next three using array.

4.   Make a list of object in which same gst then amount will merge.
        for example :-
        a. Samsung   40000   18%
        b. vivo 27500   18%
        c. earphone   1500   12%
        d. cookies   100   5%

5.   we have data of date wise wrt amount we have show only monthly data.
        for example :-
        01-04-2023   23000.00
        05-04-2023   17000.00
        09-09-2023   12300.00
        07-07-2023   34200.00
        07-06-2023   5400.00 .

6.make a program :-
        list = [2,3,4,5,6,8,9]
        input any num = 2
        output list = [8,9,2,3,4,5,6]
